Description:

This is a very low cost break out module for the ADXL335 tripple axis accelerometer. This module includes optional header pins and provides easy access to the X, Y and Z axis analogue outputs from the accelerometer. It is capable of sensing forces up to 3g in all axis. A 3.3V on-board regulator is also provided allowing the module to be powered from a 3.3 to 5V power supply source.

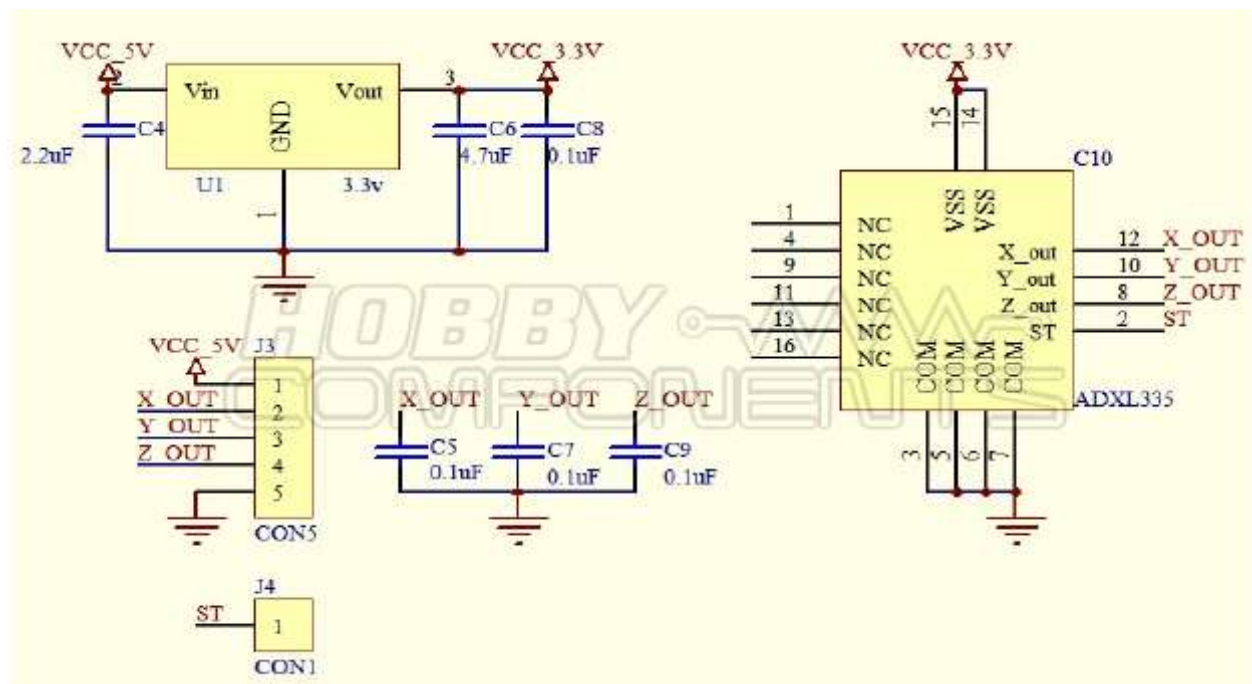

Specification:

Model number: HCMODU0070
Supply Range: 3V ~ 5V
3 Axis sensing
Full scale range: +/-3g
Sensitivity: 300mV/g (Typ)

Pinout:

Schematic:
